

Customer Services – Service unlimited

On-site services

Commissioning

Make it easy for yourself and let the ProMinent service technicians do it for you. Because these specialists adjust the processes correctly from the very beginning – the machine performance is therefore optimal. All system parameters are documented and the operating personnel will be trained in detail.

You can rely on that

- Inspection of electrical and mechanical installation work
- Adjusting the desired parameters to your process
- Testing for function, impermeability and safety of the system
- Temporary production support on request
- Training of your operating personnel

Clear benefits for you

- Maximum operational reliability
- Service in manufacturer quality
- Certified ProMinent service technicians
- Use of the latest technology
- Service reports for documentation
- Replacement and maintenance sets in manufacturer quality

Important to know

- System must be installed electrically and mechanically
- System must be freely accessible
- Safe working on the system must be ensured
- Contact person on site

Ready for you.
