Maintenance

Let the expert get to work. This guarantees that all the sealing and wearing parts on your ProMinent system are expertly replaced and in the best condition. The system is set up perfectly for smooth production processes. And you can concentrate on other work.

You can rely on that

- Replacement of the necessary sealing and wearing parts in accordance with the manufacturer's specification applicable to your system
- Assessment and functional checks of system components
- With measuring systems: Calibration of our measuring points
- Safety testing of the system in line with the usual standards
- Production of a maintenance report
- Production of a detailed service report

Refer to the quotation for the maintenance interval and dates.

Clear benefits for you

- Maximum operational reliability
- Reduction of unscheduled failures
- Reduction in operating costs
- Optimal operation

The maintenance is documented by a service report.

Important to know

- System must be freely accessible
- System must be clean and free of chemicals
- Safe working on the system must be ensured
- Contact person on site

Ready for you.
